“A kitchen shouldn’t be
just another room, it
should be an experience”

That’s the feeling you get when you choose a kitchen from European Kitchen Group.

At European Kitchen Group no two kitchens are the same. Every one is individually designed, planned and built to order in Europe, unique to your personal requirements.

Because we’re the premium distributor of Rempp and Cesar Kitchens, you’re guaranteed the very latest in trends, style and functionality with the highest in quality hardware.

The result - a beautiful, functional hard-wearing European kitchen.

- Angelo Abela, company director

Crafting Your Dreams into Reality

Every home is different and every family one of a kind. When you commission a European kitchen from us, our design team work with you to develop a unique, quality product tailored to your needs. We combine authentic, hard-wearing materials with timeless designs to mirror your unique, individual style.

Our designers work with you to craft an entirely customised kitchen, so no two products are ever identical. Whether you are after a classic kitchen, a contemporary feel, or a mixture of the two, one thing will never change: our **commitment to sleek design, authentic materials, and functional, quality living.**

We have a range of kitchens on display, featuring both cutting edge and timeless designs from two of Europe's major kitchen brands, Rempp and Cesar. Visit our showroom and **see for yourself - the quality, durability and functionality** of these two leading kitchen manufacturers.

Open 9-5 Weekdays and 10-4 on Saturdays, you can view a range of the latest and most popular kitchen design elements at our **South Melbourne showroom**. 592 City Rd Sth Melb Vic.

Let us design a free snapshot view of your dream kitchen today

1. Call us on +613 8539 4449 to make an appointment

2. Visit European Kitchen Group's showroom to discuss your options. Take your plans/dimensions of your proposed kitchen. Approx 1hr.

3. Receive your personalised Kitchen Presentation. View and discuss your design, specifications and quotation.

4. Visit our website for more ideas -> europeankitchengroup.com.au

Kitchen is my home. Home is my joy.

Invite us into your life

People as the focal point of the project - that is the fundamental principle underlying all of Cesar's design concepts.

Our kitchens will not leave you indifferent. With their strong personality and distinct character, they are bound to arouse intense emotions. They are not simply objects, they are experiences - each day, the reason to enjoy being together.

C E S A R *Maxima 2.2*

Maxima 2.2

is the creative design system that distinguishes Cesar for its uniqueness and cross-functionality. Over 90 finishes combined with various opening methods make Maxima 2.2 an architectural project that meets modularity, technological and flexibility requirements while preserving its linearity and attention to materials in every layout.

The refined aesthetic result

is obtained by choosing materials of the same colour but with different surface finishes like Bianco, bush-hammered stoneware for the worktop and smooth ceramic for the doors. The latter is combined with a Titanio finish frame to make the frame grip edging.

The continuous surface

of the work island is interrupted by the Rovere Termocotto breakfast bar. The finish of the worktop is replicated inside the base units with their Rovere Bruno melamine carcasses and in the drawer and jumbo drawer interior accessories in solid Rovere Scuro.

The tall units with retracting doors

offer maximum space exploitation: the stainless steel pullout top offers an additional work surface. Once the doors are shut the shelves and appliances are concealed behind them for a really uncluttered, clean look.

The inside grip edging

is carved into the door front: the finish continues uninterrupted on the entire surface.

Unit

Freedom is the most important thing in life - freedom to evolve, to adapt, to experience new ways, new cultures, new people. Freedom to create, freedom to explore oneself. Technology helps in our search for freedom, however we all need a reference point, a warm place, a place to move around in and explore. And in the end, any journey takes us back home.

Fenix laminates and metallic effect lacquers.

Laguna silk effect lacquer. Eero handles in Laguna lacquer and marble
shaped worktop.

Bianco silk effect lacquer. Eero
handles and adjustable feet
in Champagne brass. Hanex
N-White shaped worktop.

Intarsio

It is deviating from the rules that makes the biggest impression. I love symmetry but not convention. I look for the original that inspired the repetition. Those who put their trust in tradition know that to innovate, sometimes, it is simply necessary to change the point of view. They create new proportions that give rise to new sensations.

And in this, we discover a different kind of beauty each time.

Rovere Mediterraneo Intarsio wood and Verde Guatemala marble with Brushed Champagne Ouverture handles. Breakfast bar with Champagne Aluminium Flamingo frame.

Breakfast bar in Rovere Fossile, Grigio Billiemi marble countertop. Black aluminium Tratto handle. Column cabinets and kitchen island in wood Rovere Fossile Intarsio.

Williamsburg Workstation and The 50's shelving system. Cabinets in wood Rovere Corvino.

3D Kitchen Modelling

At Eurpoean Kitchen Group we work hard to make sure our clients are satisfied with their made-to-order kitchens. This means giving them a clear understanding of the process, a complete visual representation of their future kitchen, and a **comprehensive quote** to help them craft their dreams into reality.

With the latest modelling software, we work with our clients to visualise 100% of their European kitchen. Using our 3D modelling software, at European Kitchen Group, we are able to give our clients high-resolution digital representations of their Cesar or Rempp kitchen.

Because our kitchens are made-to-order, our clients can personalise every aspect of their design, from kitchen hardware to the selection of benchtops and splashbacks. Thanks to our state-of-the-art kitchen design software, clients are able to visualise their truly unique kitchens before construction. This way, we ensure the utmost in client satisfaction from the very beginning.

Once our clients have perfected their dream kitchen with our local designers, we send their design specifications to our European workspaces. There our teams manufacture and assemble our kitchens, which are then imported ready-made. **Construction, import and installation costs are covered in our free quote**, so our clients are faced with no surprises.

Enjoy your home.

What is it that makes a great family kitchen?

Manufactured in Germany's Black Forest, Rempp have been a family-owned business since 1930. Rempp specialise in strong, quality kitchens. Every one of their 25 standard decors blend traditional craftsmanship, perfected over 80+ years, with modern technology to produce high-quality, durable kitchens.

Variable in design, style and specifications, a Rempp kitchen is a kitchen to be lived in. Rempp kitchens are made in a wide range of styles, all with flexible design features. Clients can customise not only the size of their product, including drawer, cabinet and pull-out specifications, but also the handles, shape, feel and material of their unique kitchen. No matter what they choose, owners of a Rempp kitchen know they have a functional, durable and stylish kitchen made to be lived in.

Because every home is unique, EKG work with clients to develop their own Rempp kitchen based on their needs. Whether in T- or U-shape designs, islands or custom layouts, Rempp provide high-quality, bespoke kitchens that are made to feel like home.

As Rempp are one of Germany's only remaining family-owned international kitchen businesses, they are committed to providing cutting-edge materials and design solutions. This is only possible because Rempp are small enough to offer flexible and up-to-the-minute design solutions, something larger manufactures are unable to manage. Cutting edge, customised, and always crafted with care, your Rempp kitchen is made for you.

Phoenix

Develop individuality

with over 80 fronts, 50 handle styles and 30 worktops to select from.

A wide range of exclusive organisation systems is available for flexible drawer and cupboard interiors.

Hand-finished lacquered surface in concrete look – each front is exceptionally unique.

Rempp
KÜCHEN

Ergonomics

The worktop should be positioned at exactly the right level to relieve the strain on your back. Kitchens planned ergonomically are always tailored to the height of the person who spends most time using them. You can either opt for an optimised single worktop level or separate zones adapted in level according to their functions.

Ergonomic drawers are of great value. Sliding with ease to and fro, they allow you to view the contents of a drawer from the front to the very back. Intelligent drawer technology makes your work easier.

Built-in appliances such as refrigerators, ovens, dishwashers or microwaves should be positioned at a comfortable height.

Phoenix trowelled, side door mitred. Slimline steel effect worktop.

Illumination

An exact lighting of work areas is important for comfortable and relaxed use of your kitchen. An illuminated structural shelf for wall units developed by Rempp Küchen produces great workable light as well as ambiance. Select from Neon, Halogen or LED lighting systems to suit to your needs.

Alborg

Alborg

See perfection

The naturalness of the veneered oak planks can virtually be felt thanks to the specially sliced veneers. In combination with the white lacquered front, this kitchen's textural combinations speak volumes.

Storage solutions

Soft lift door panels, pull out appliance shelves and organizer racks inside the pantry door make use of every bit of space. Keep everything tucked away for an effortlessly neat and tidy kitchen.

Cliff Kito

Cliff Kito

Urban kitchen world - contemporary, aesthetic, made-to-last

Choose from a range of modern concrete and stone reproductions for fronts, worktops and the complete kitchen environment. Surfaces are extremely similar to the genuine materials and in no way inferior to their big siblings in appearance or design. They are highly durable and easy to maintain.

A design that delights

Imitation steel or concrete add to Rempp's variety, and delight with their look and feel. Clean lines and mitred edges deliver a fresh and streamline experience.

Steel x-line

Immerse yourself

Experience for yourself Rempp Kuchen's exquisite and unique range of hand-finished worktops, fronts, handle (or no handle) options, ergonomic storage solutions and superior quality workmanship at European Kitchen Group's South Melbourne showroom.

The shelving system 2020 is technically sophisticated, visually attractive, stable and very practical. It can be integrated into many furniture concepts, whether individually, one above the other, next to each other or as a group. This smart cube can be equipped with all 19-mm thick front materials or with black glass.

The sliding pocket pivot doors are inserted into the carcass, leaving the space free regardless of what the cabinet interior is to be used for. The cabinet can be planned with absolute individuality, either as a workplace or a functional area for your electrical appliances.
